

I appeal to the commission to reject the SBC (formerly Nevada Bell) from obtaining long distance service in Nevada with the current 271 filing. My company has been excluded from providing competitive offerings for disaster recovery, enhanced private networking and alternative routing to consumers throughout the state. SBC has refused to provide interconnection facilities to alternative radio carriers necessary for our business despite repeated requests. Complaints to regulatory agencies, including this Commission, have gone unanswered. Until SBC is forced to comply with the rules and regulations of this Commission, the application must be denied.
